RE: Lowry Landfill Site
Syntex Chemicals, Inc.
Supplemental 104(e) Response

Dear Mr. Dodson:

The purpose of this letter is to supplement the response of Syntex Chemicals, Inc. dated September 8, 1986, to your request pursuant to Section 104(e) of CERCLA for information related to the Section 6 of the Lowry Landfill site.

In connection with lawsuits about insurance coverage, Syntex Chemicals, Inc. has recently discovered that up to 900,339 gallons of aqueous waste previously attributed to the AERRCO - Rocky Flats site in the EPA's July 14, 1988 Potentially Responsible Party Search report for the AERRCO - Rocky Flats site may have, instead, been delivered to the Lowry Landfill.

Sincerely,

Gary Kaufman, P.E.
Project Manager, Remedial/Technical Services

RE: Lowry Landfill Site
Syntex Chemicals, Inc.
Clarification of June 23, 1997 Letter

Dear Mr. Dodson:

The purpose of this letter is to clarify a statement that was made in my previous letter of June 23, 1997. In that letter, I stated that up to 900,339 gallons of aqueous wastes that was previously attributed to the AERRCO-Rocky Flats site may have, instead, been delivered to the Lowry Landfill. The point of clarification is that what was previously referred to as the AERRCO-Rocky Flats site is now identified by EPA as the Rocky Flats Industrial Park site ("RFIP").

The RFIP site encompasses approximately 90 acres 2 miles east of Highway 93 on Highway 72 in Jefferson County, Colorado. The site is composed of 5 private businesses and is separate and distinct from the U.S. Department of Energy's Rocky Flats Environmental Technology Site that lies approximately 2 miles north of RFIP. The AERRCO portion of the Rocky Flats Industrial Park consists of 5 acres and was the subject of an EPA removal action. Please call me if you have any questions.

Sincerely,

Gary Kaufman
